At Rong Shu, we are committed to the environment protection and the preservation of the natural life. We have partnered with the GRS certified yarn supplier to develop sustainable ribbons that are woven with yarns made by post-consumer waste, the well-known plastic bottles. The used plastic bottles that we use for our recycled ribbons are collected via various recycling points throughout the World. These bottles are then thoroughly cleaned for hygienic purposes and are then broken down into smaller plastic elements. These plastic flakes are melted back into a liquid form then converted into filaments. A number of filaments are then combined together and spun to create a 100% recycled ribbon yarn. 5,000m of 25mm satin uses 600 recycled bottles, which are not going to waste, landfill or damage the wider environment.
